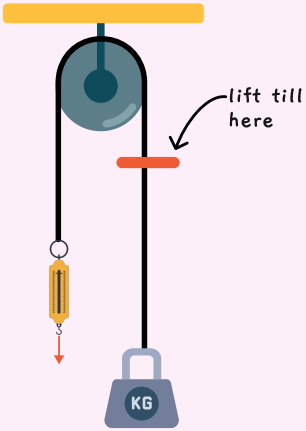
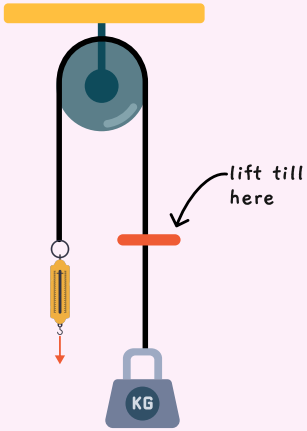
pulley: experiment 4

Use a fixed pulley to lift a load that weighs 3kg. Take 3 tries to lift the load but for each try to vary the height of the pulley. Find out how the effort varies with height.

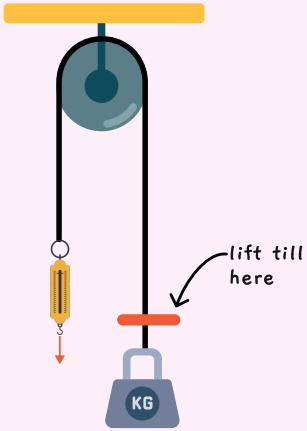
setup 1



setup 2



setup 3



observation

measure the effort for each:

	effort
setup 1	
setup 2	
setup 3	

which setup uses the least effort:

pulley: experiment 5

Use a pulley to lift 3kg by pulling the rope from 3 different sides.
Find the effort for each.
