

name: _____

level-up exercise

railway barrier

robotics · level 2 · electronics

your challenge

Make the barrier stop at a fixed position without turning beyond its stopping point.

parts i used:

☐

☐

☐

did it improve the model? how?

 write what you changed and whether it worked better

name: _____

level-up exercise

soccer bot

robotics · level 2 · electronics

your challenge

Build the same machine, but make it look completely different from the manual.

name: _____

openhouse

level-up exercise

wind turbine

robotics · level 2 · electronics

your challenge

Redesign the wind turbine with a completely different tower shape while keeping it stable. And this time power a motor instead of an LED.
