

pulley: experiment 1

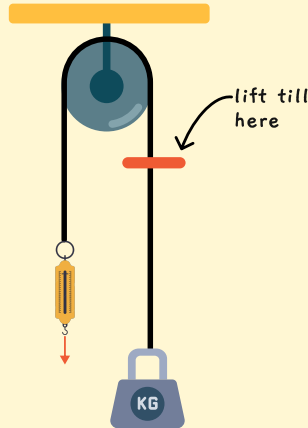

Pull 3 different  using a single pulley. Find out how much  effort is needed to lift each.

1.

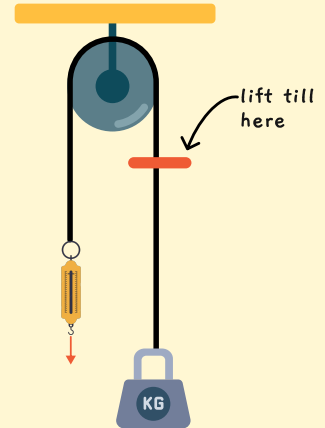

0.5 kg

2.

1 kg

3.

1.5 kg

observation

measure the effort for each  used:

	 KG	 effort
1.	0.5kg	
2.	1kg	
3.	1.5kg	
which weight uses the most  effort:		

result

tick the correct answer

heavier

lighter

the **weight**,

more

lesser

the **effort**
