

pulley: experiment 3

Use a pulley to lift 1.5kg. Take 3 tries to lift 1.5kg but for each try vary the height of the pulley. Find out if the effort varies with height.

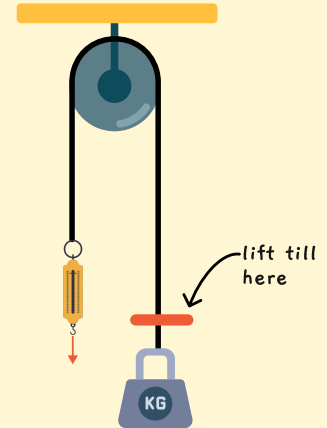

setup 1

setup 2

setup 3

observation

measure the  effort for each:

	 effort
setup 1	
setup 2	
setup 3	
which setup uses the least  effort:
