

wheel and axle: experiment 1

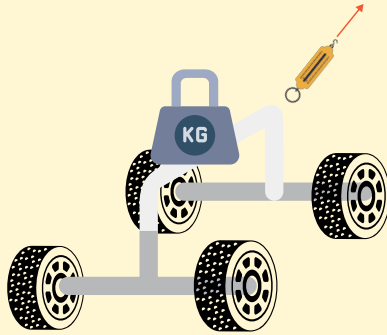

Build a 4-wheel cart using 2 axles and 4 wheels.
Attach 3 different  - 0.5kg, 1kg and 1.5kg
Observe the effort needed to pull the cart for each.

1.

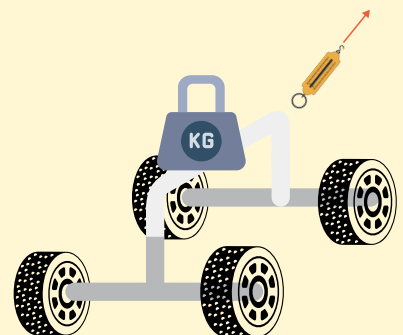

0.5 kg

2.

1 kg

3.

1.5 kg

observation

measure the effort for each  used:

		 effort
1.	0.5 kg	
2.	1kg	
3.	1.5kg	
which cart uses the most  effort:		

result

tick the correct answer

heavier

lighter

the **weight**,

more

lesser

the **effort**
