

gears: experiment 5

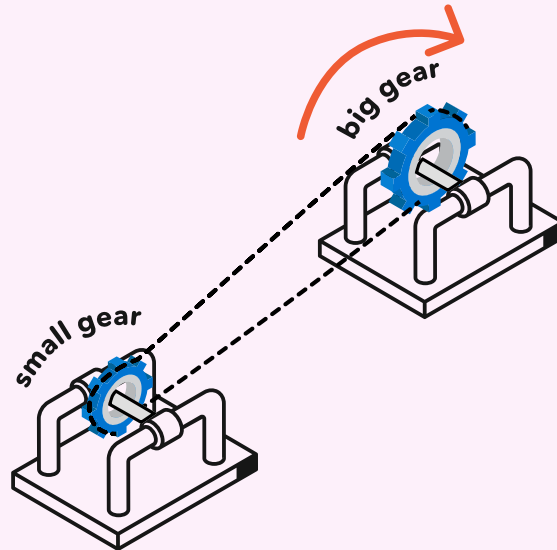

Connect a big size gear to a small gear using a chain.

If one rotation on the big gear = distance of 10cm on the small gear.

Then find the distance covered on the small gear when the big gear is turned 3,5,9 times.

turns

- 3 turns
- 5 turns
- 9 turns

observation

note the turns and distance for each:

	 turns on big gear	 turns on small gear	 distance on small gear
1.	3 turns		
2.	5 turns		
3.	9 turns		

which observation covers the most distance:
