

levers: experiment 4

Build a weighing scale using a lever and fulcrum at center position to balance 2kg, 2.5kg & 3kg by evenly balancing it against materials you can find around.

observation

mention the objects that evenly balanced against each:

		 objects used
1.	2 kg	
2.	2.5 kg	
3.	3 kg	

tick the right answer

to evenly balance both sides, the  must be:

equal

unequal
