

levers: experiment 6

Use levers of 3 different sizes and fulcrum close to the load.
Find the best lever size that can lift 2kg with less effort.

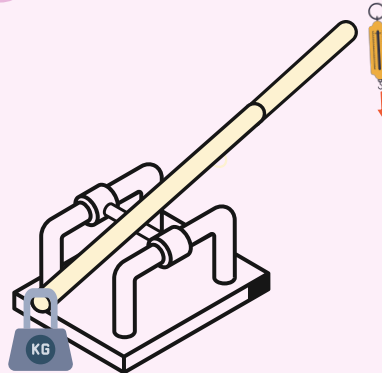

1.

short 1 pipe

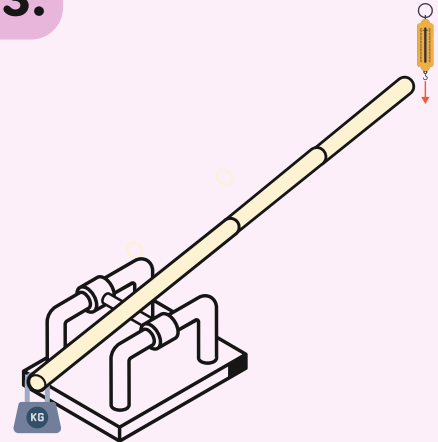

2.

medium 2 pipes

3.

long 3 pipes

observation

measure the effort for each lever used:

	lever	 effort
1.	short	
2.	medium	
3.	long	
which lever size uses the least  effort:		

result

tick the correct answer

_____ the **lever size** _____ the **effort**
