

pulley: experiment 4

Use a fixed pulley to lift a load that weighs 3kg. Take 3 tries to lift the load but for each try to vary the height of the pulley. Find out how the effort varies with height.

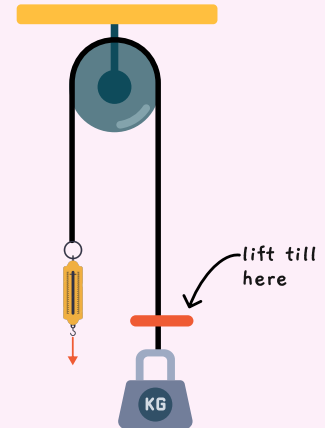

setup 1

setup 2

setup 3

observation

measure the  effort for each:

	 effort
setup 1	
setup 2	
setup 3	
which setup uses the least  effort:
