

wheel and axle: experiment 3

Build a cart using 2 axles and 4 wheels, where the front axle controls the direction. Position the front axle in the:

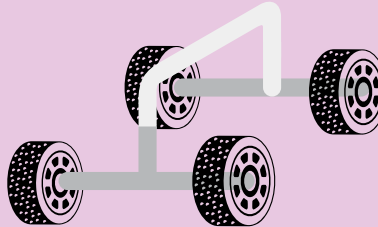

1) left direction 2) centre 3) right direction

Push the cart each time and observe how the axle angle changes the cart's direction.

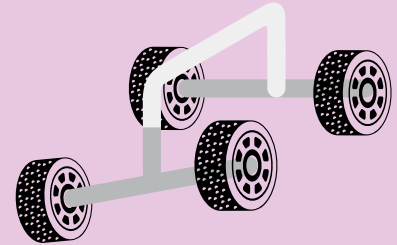

1.

2.

3.

observation

note the direction for each:

	  direction
left direction	
centre	
right direction
